

# Food Management Solutions

LP423A/LP433A Series Thermal Transfer/Direct Thermal Barcode Printer

## Our Customer

Serving people delicacies for more than 10 years, the Chinese cuisine and snack restaurant with more than 10 branches in Taiwan is seeking a new way to manage their food storage while being cost-effective due to the increasing business workload and tougher regulations of food safety.

## Our Solutions

WINCODE LP4A Series Standalone Desktop Barcode Printer is selected to meet customer's demanding requirements by the following features:

### Easy Label Editing on WinLabel

User can define the label format on software and each field of the label could be defined by multiple database sources (as the right example.) Transfer the file into SD card of the printer to run standalone operation without computer connection.

Product Code:	4710110811241	} Import data from database
Product Name:	3*Beef Short ribs A+	
Place:	Taiwan	
Part:	Shoulder	
Production Date:	09-21-2016 01:48PM	→ Data from RTC clock in the printer
Valid Date:	12-20-2016	→ Define date offset from RTC clock
Weight:	0.021kg	→ Data from external scale via RS232 interface
Unit price:	USD10/g	→ Data from the external keyboard input via USB host interface
Total price:	USD210	→ Data can be obtained by computation of each object automatically
		→ Barcode is composed of each object data whatever it is variable data
	471011081124109-21-2016000.021	

### Multiple External Devices Connectivity

LP4A series printer could connect multiple USB devices together (e.g. keyboard and scanner), and the RS232 interface is also compatible with multiple external devices such as scale or analyzer at the same time.

### Customized Standalone Program under BASIC Programming Language

Built-in BASIC interpreter engine could customize your own programming code to suit various requirements.

### Smart Searching

Numerous standalone files on the printer can be quickly searched by scanner or keyboard through specific barcode number or keyword.

### Two Names on One File

Each standalone file can have 2 names for searching (e.g. scan barcode, but only show item name on the screen.)

### Customized Record Function

Each printing history can be recorded in the SD card of printer.

### Multilingual Display Panel

LCD screen supports multiple language file names.
